Use EveryonePrint, the UWStudent Mobile Printing Service, Through a Web Browser

Introduction

The UWStudent Mobile printing service provides users with the ability to print documents through a web browser interface without the need to install printers on their personal computers. The Mobile printing service is connected to the UWStudent print monitoring solution, so charges to printer as deducted from a student’s print balance account.

Notes: This service is only available on campus. You must be connected to the UWyo wireless or a hardwired connection.

Procedure

1. Go to the **UWStudent Mobile Printing web page** and click on **Log into the mobile printing service**, http://microlab.uwyo.edu/mobileprint/

2. Log in using your **UW username and password**.

3. On the EveryonePrint start page click **Browse** and navigate to the document to print.

4. Click **Open**.

5. The path to the document to print will appear in the Upload Document To Print window. Click **Next**.
6. A status window will open showing available printers and the print job status. It may take a few seconds for the print job to process and allow you to start printing. Once the job is processed a list of printers will appear and the status will say "Awaiting Release."

Using the drop down box, **select the printer you want to print to** and then click **Print**. (Note: Printer names will contain some location information.)
